EDUCATION

MIREA - Russian Technological University <i>Ph.D. student, Informatics and Information Processes (2.3.8)</i>	Moscow, Russia <i>Sep. 2026 – Present</i>
MIREA - Russian Technological University <i>Master of Software Engineering</i>	Moscow, Russia <i>Sep. 2024 – June 2026</i>
MIREA - Russian Technological University <i>Bachelor of Software Engineering, GPA: 4.97 (out of 5.0)</i>	Moscow, Russia <i>Sep. 2020 – June 2024</i>

EXPERIENCE

Programmer <i>RTU MIREA, RTUITLab</i>	Sep. 2024 – Present <i>Moscow, Russia</i>
- Setting up a private compute cluster for laboratory workloads; the project is internal and not for public release - Developing the open-source RDS-2P quadruped robot for education and DIY assembly, with voice and Telegram-bot control - Led firmware development for programmable battery packs on FreeRTOS for the RDS-2A quadruped robot - Developed an open-source micro-ROS wheeled robot for the ROS Meetup 2025 hackathon and co-organized the event - Led a robotics club focused on building the Tinker biped robot with SberRobotics funding at RTU MIREA - Built AI modules for RDS-2P: Vosk-based speech recognition and on-device text/speech generation on Rockchip RK3588 to answer university-related questions - Trained the RDS-2P robot to walk using PPO in MuJoCo and transferred the policy to physical hardware - Migrated the full RDS-2P sensor stack to ROS 2 Humble - Implemented a Sber Portal voice-assistant skill for controlling the RDS-2P robot - Built a SetFit-based intent classifier for the voice-assistant skill	
Computer Operator <i>RTU MIREA, RTUITLab</i>	Apr. 2022 – Aug. 2024 <i>Moscow, Russia</i>
- Developed autonomous navigation for the Unitree A1 quadruped using a Slamtec LiDAR SDK and DWA for the Army-2022 exhibition - Developed the Smart Dormitory information system for the Samsung Academy finals, including embedded, mobile, and web apps, plus backend and database components - Developed motor-control firmware for the large-scale RDB-1 quadruped using FreeRTOS and PlatformIO, and added a BLE control interface with a companion web app - Assembled and manufactured RDS-1 robot dogs for student and school workshops - Implemented telepresence control for the Unitree A1 robot over a 4G cellular network - Designed and prototyped a CI system for TFlex CAD - Delivered additional engineering tasks related to design and manufacturing for organizational orders	

TECHNICAL SKILLS

Languages: C/C++, Python, Java, Kotlin, SQL, HTML/CSS/JS
Frameworks: ROS2, MicroROS, Mujoco, Flask, Spring, FastAPI, gRPC, Vue.js
Testing: Pytest, Selenium
Storage: PostgreSQL, Redis, InfluxDB
DevOps: GitHub CI/CD, Docker, Kubernetes
Embedded: FreeRTOS, RKLLM, RKNN, TouchGFX, Wokwi
Embedded tooling: PlatformIO, KeilStudio, CubeIDE
CAD & CAM: TFlex CAD, EasyEDA, 3D Printing Slicers
Hands-on Electronics: Soldering, battery spot welding

SOFT SKILLS

Languages: Russian (Native Speaker), English (B1)

CERTIFICATION

DevOps Engineer , MIREA Additional Education	2023 – 2024
Management , MIREA Additional Education	2024
IT Academy Samsung (IoT Track) , Samsung Innovation Campus	2021 – 2022
